ciated Press Afternoon Dispatches.] ALEXANDRIA, August 1 .- There are troops enough here now to hold the against Arabi, but not enough for an advance. The French fleet sailed to-day, by order of the Consul-General The Suez Canal Company telegraphs from Ismailia to press the Bedouin chiefs who placed themselves at the disposal of De Lesseps, by the direction of Arabi. The Khedive is authorized by the Delivit Arabi. ized by the British to occupy as much of the Suez Canal as is necessary for the expulsion of the rebels. The French residents of Port Said announced them selves under the protection of the United States, on account of the with-drawal of the French fleet.

We look upon the Press "gang" as among the most intelligent Updies of men in the State. They are men of affairs, journalists by profession, editors, reporters and correspondents. Their annual trips are yearly vacations, their wives and daughters accompanying them. They look through many eyes, speak through as many papers as they represent, and address a million people. They visited Southern California last year, and were received hospitably wherever they went; in fact, were the guests of every community they visited; spent about forty dollars each of their own money; were abeent ten days; returned rested and refreshed. In their papers appeared their observations, their honest convictions. Southern California is a grand country. They had to say so. The weeple, are generous and alive.

their observations, southern California is a grand country. They had to say so. The people are generous and alive. This they affirmed. A boom followed. Within a year land at Riverside and Los Angeles has doubled in value. The population has quadrupled. We only wish the association could spend as much time with us as they spent in the orange groves last year.

Reathers—

SAN FRANCISCO, August 1.—The teamer Uity of Peking sailed to-day for China. She took away 216 Chinese, most of whom took out return certificates. The British steamer Anjer Head will sail to-morrow with 503 much time with us as they spent in the orange groves last year.

The House Committee on Foreign Affairs to-day unanimously agreed upon a report concerning the recent Chiliperu investigation, which will be submitted to the House before adjournment this afternoon. It is understood that it refers to the papers missing represented. The military from Leadville and other towns in the State participated in the opening exercises. The city is crowded with strangers. Hon. William D. Kelley, of Pennsylvania, is now making the opening address.

Thelan vs. Tyler & Dunlap.—Leave interest of the House before adjournment this afternoon. It is understood that it refers to the papers missing from the files of the State Department as unimportant, but suggests that greater care be exercised in keeping the files intact. It also declares that nothing was adduced in the testimony to implicate any foreign ominister or official of the United States, or Senator or member of Congress in any improper effort to influence official action in the interest of any claim against Peru.

the most vexatious and important questions connected, with horticultural pursuits in this country.

The Etiwanda Water Company was incorporated May 9, 1882, as the most convenient method of owning and distributing the waters of the Etiwanda settlement. The Company contracted with Chaffey Brothers, who were the owners of the land and water at Etiwanda, for all their water rights. The Chaffey Brothers also contracted to construct a distributing reservoir at the head of the tract of land, to pipe or fume the waters of the two canyons to this reservoir, and to conduct the water in concrete pipes from this reservoir to the highest corner of each tenacre tract of the lands to be sold. In payment for these water rights, reservoir, flumes, system of pipes, etc.—all of which become the absolute property of the Water Company—the Company, convey to the Chaffey Brothers the stock of the Company, to be estimated as follows: On the first of September, 1882, the water is measured where it is emptied into the reservoir from the flume, and one share of stock is issued for each one-eighth inch of water in the atream at the time of such measurement. The Chaffey Brothers reserve the right to develop and save water in the canyons and in certain clenegas or springs near the mouth of the canyons. These rights of development are reserved for ten years.

On the 15th of July of any year within the In the most Reliable Compa M. KREMER rights of development are reserved for ten years.

On the 15th of July of any year within the ten years, as the waters of the canyon and springs are developed, new measurements of the streams are made where they empty into the reservoir, and stock is issued for the increased amount of water on the basis above given. These measurements are provided for in mid-aummer at a time when the mountain streams are at their lowest point.

On this contract the Chaffey Brothers are allowed on demand one thousand shares of stock, to go with the land now sold and the land to be sold during the summer.

One share of stock is given by them with each acre of land sold, so that when the land is all sold the settlers will own and control the water company. Agent for the following Sterling Fire an Is Agent for the following Sterling Fire and Marine Insurance Companies:

It is estimated that when the tract is fully setted this cost cannot exceed fifty cents an acreper year.

The water, in coming down from the mouth of the canyons to the reservoir falls about 1,000 feet in two miles, and the stream will furnish a very fine water power of forty horse power every quarter of a mile down the slope. By piping the water this power can be utilized without loss of water. The Chaffey Brothers reserve this water power, and intend within a year to pipe the water far enough to secure sufficient power to run an electric machine capable of furnishing electricity for three electric lights. These lights will be put upon towers, and one tower will be pretended in the control of the strength of the control of the con orth German Fire Insurance Co., of Ham burg. Capital, \$1,750,000. The quantity of water is fixed and definite. Each ten acres of land will be entitled to 37% inches of water for 24 hours every month, except in an extraordinary dry season when the amount will be a little less. During the winter of course water will be plenty, and during the spring, up to July 1st, the amount will be far in excess of this basis.

The price of water will be regulated by the cost of taking care of the company's property, and distributing the water to the stockholds ra. It is estimated that when the tract is fully settled this cost cannot exceed fifty cents an acre per year.

Etiwanda is located at the foot of the mountains, six miles east of the celebrated Cucamongo vineyaris, at an elevation of from 1,000 to 1,600 feet above sea level, and about forty-five miles from the ocean in a direct line.

The tract, when complete, will consist of from 3,000 to 4,000 acres and cerhaps more, and will extend from the mountains on the north to the Southern Pacific Railroad on the South, where Etiwanda station will be established as soon as the settlement will warrant it. There are large quantities of lava, and rooks made black by the action of fire and water, and large deposits of porphyry and chalky soil, which, on examination, are found to contain silver in abundance. There is a vast amount of surface deposit which assays very high, and is easily milled. Sometimes parties who have not thoroughly examined the mines of this district think that when these deposits are thoroughly worked the supply of silver will be exhausted; but that such is not the case can be easily proven by examin-ing the ore taken from mines that have been sunk to a depth of over one LOS ANGELES, . . .

The fact is we can challenge any mining district to produce as rich ore as can be found in this district. Unquestionably the mines here cannot be excelled. With the necessary capital excelled. With the necessary capital to develop them they will turn out bullion to such an extent as to astonish the most expert miners.

American stock breeding is thus magnified by President Francis A Walker, writing to the Princeton

The trotting horse we have created, certainly the most useful variety of the equine species, and we have improved that variety in a degree unprecedented in natural history. Two generations ago the trotting of a mile in two minutes and forty seconds was so rare as to give rise to a proverbial phrase indicating something extraordinary; it is now a common occurrence. "But a few years ago," wrote Prof. Brewer in 1876, "the speed of a mile in 2:30 was unheard of: now perhaps five hundred or six hundred horses are known to have trotted a mile in that time." The number is to-day perhaps nearer one The trotting horse we have created number is to-day perhaps nearer one thousand than five hundred. Steadily onward have American horse raisers pressed the limit of mile-speed, until, within the last three seasons, the amaz-ing figures 2:10 have been reached by one trotter and closely approached by another
